OBJECTIVES

- To understand laparoscopic rules and limitations in cancer surgery
- To review anatomical landmarks and their importance during a laparoscopic pelvic and para-aortic approach
- To understand the different types of laparoscopic radical hysterectomy and to compare with the laparotomic route in terms of radicality and results, and to interpret scientific data
- To understand surgical strategy for complex oncologic cases

EDUCATIONAL METHODS

- Interactive theoretical and video sessions between faculty and course participants
- Live and pre-recorded operative demonstrations
- Practical sessions in live tissue and pelvic trainer
